

IF you want to prepare User Card from LIMS then criteria will be as follow

- 1) Make a new database
- 2) Import Member table in it
- 3) Then go to the Reports Menu
- 4) Then Create Report by Design View

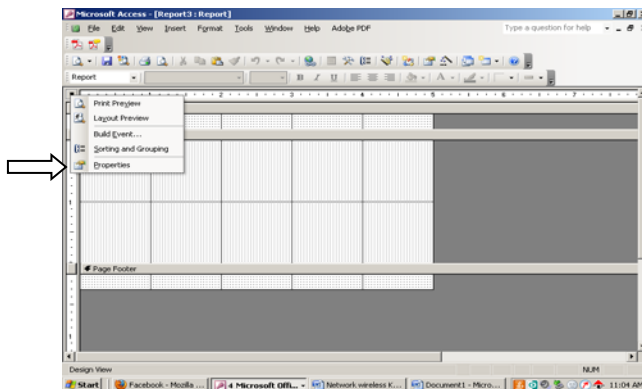

Then this window will open.

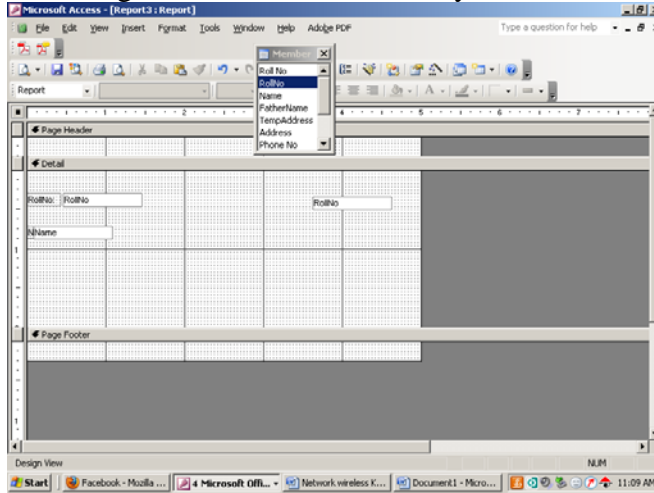

Right click on the black dot on very left corner of the report window.

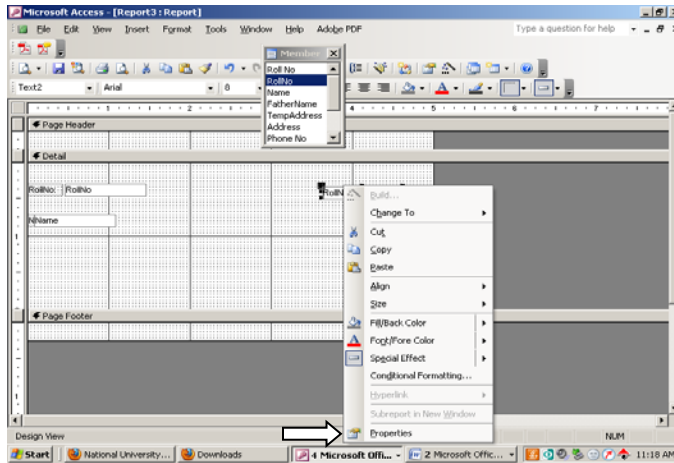

Then choose the option properties.

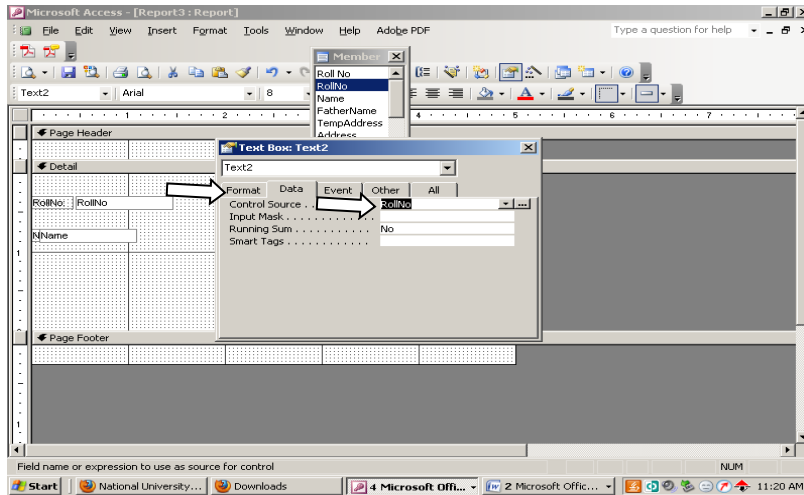

Then go to the Data Menu and select member table from Record source Option
Then drag the desired fields which you want to show on user's card like this

If you want to make barcode of User's Roll no then again drag Rollno from Member table and then right click on this Rollno field then go to the option properties.

In the control Source Option write here “*”&[RollNo]&”*

And go to the option Format Here change the Font name with idautomationHC39M. Then save this Report. And see the preview.
